- Development (Scrum, Kanban)
- Web Accessibility & Responsive Design

PROFESSIONAL SUMMARY

Front-end-focused Web Developer (HTML/CSS/JavaScript, Astro, React, Tailwind) with a foundation in back-end development (Python/Django) and SQL. Experience building real, currently-in-use websites and end-to-end web projects, from UI to server-side logic. Seeking my first professional opportunity to contribute solutions and keep growing in a real-world development environment.

PROYECTOS

Personal Portfolio (EN/ES)

Astro · JavaScript · HTML · TailwindCSS

Website used to introduce myself and showcase projects, with clear sections (profile, skills, projects, contact) and JavaScript scripts to improve interaction. Site: <http://duarteezequiel-portfolio.vercel.app/> + [REPO](#)

Comedor Luna

Astro · TailwindCSS · JavaScript · HTML · CSS

Informational landing site for a real restaurant currently in use, responsive design and clarity-focused: section-based navigation, organized content, and reusable components.

Site: <https://zek1t0.github.io/comedor-luna/> + [REPO](#)

Travel Blog

Python · Django · HTML · CSS

Team-built blog-style application with roles (visitor / member / contributor) and authentication; supports full CRUD for posts and comments, plus filters by category, post age, and alphabetical order.

Site: <https://sudonostalgia.pythonanywhere.com/> + [REPO](#)

EDUCATION
